

Assignment 1

Finish the first dashboard that we practiced in class and please ensure that the following insights are shown

1. Total Revenue by State
2. Total Revenue by date
3. Total Revenue by Product segment
4. Total Revenue by Product category
5. Average Revenue by Manufacturer and Product Category
6. Average Revenue by Product Category and Product Segment

Feel free to come up with more insights.

Assignment 2

Using the dataset for Bike buyers shared in the group, create a column named **Age Category** using the following:

20 to 34: Young Adult

35 to 49: Adult

50 to 64: Seniors

65 and Above: Elderly

Answer the following questions.

1. What is the Total and Average Income?
2. What is the Maximum and Minimum Income?
3. On average what Age category are the most populated?
4. Who generated more income, singles or married?
5. Who purchased more bikes, males or females?
6. What marital status / gender had the youngest client, and what is this person's total income?

Also show the following insights:

1. Total Income by Region
2. Average Income by Region and Bike Purchase
3. Average Income by Age Category
4. Bike Purchase by Region and Cars owned
5. Bike Purchase by Gender
6. Bike Purchase by Age Category
7. Average Income by Marital Status and Bike Purchase

Feel free to come up with more insights.

Note: Be strategic with your dashboard. Dashboards must be interactive (including slicers)
