

About Dataset

Context

Welcome. This is a Women's Clothing E-Commerce dataset revolving around the reviews written by customers. Its nine supportive features offer a great environment to parse out the text through its multiple dimensions. Because this is real commercial data, it has been anonymized, and references to the company in the review text and body have been replaced with “retailer”.

Content

This dataset includes 23486 rows and 10 feature variables. Each row corresponds to a customer review, and includes the variables:

Title: String variable for the title of the review.

Review Text: String variable for the review body.

Rating: Positive Ordinal Integer variable for the product score granted by the customer from 1 Worst, to 5 Best.

Recommended IND: Binary variable stating where the customer recommends the product where 1 is recommended, 0 is not recommended.

Positive Feedback Count: Positive Integer documenting the number of other customers who found this review positive.

Division Name: Categorical name of the product high level division.

Department Name: Categorical name of the product department name.

Class Name: Categorical name of the product class name.

Task

Use your Problem-Solving Techniques to come up with your individual questions and provide data driven answers to them.
